

May is Mental Health Awareness Month

"HEARING" LIGHT WAVES - "SEEING" SOUND WAVES

Thursday, May 19 at 6 p.m.

Unique sensory-related stimuli and psychiatric challenges can be common to those who are on the autism spectrum. Come hear what autism advocates and author-couple R.V. and Marlene Kuser have to say about R.V.'s experience living with autism and how he can hear the sound of light as well as see auras and sound waves. R.V. Kuser will also talk about his "3-D" writing process and how it helped him write two books on the subject (with another in the works).

Registration is recommended. To register, call the Lewisville Branch, email Sue at deguzmse@forsyth.cc, or scan the QR code.
