

# Climate Change

All titles are available through Nassau Digital Doorway and the Overdrive and Libby apps.

## Climate change: a very short introduction

by Mark Maslin

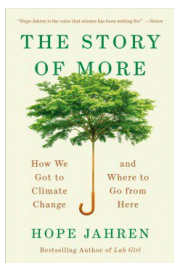

Discusses what climate change is and why it is happening, and considers some of the political, social, economic, and scientific issues that characterize the debate about global warming.

## No one is too small to make a difference

by Greta Thunberg

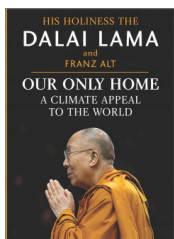

The groundbreaking speeches of Greta Thunberg, the young climate activist who has become the voice of a generation, including her historic address to the United Nations.

## The story of more: how we got to climate change and where to go from here

by Hope Jahren

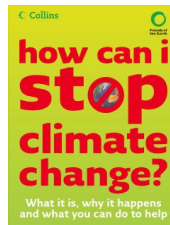

Describes how the science behind key inventions has helped us, but ultimately hurt the earth, and offers science-based tools for fighting back.

## Our only home: a climate appeal to the world

by Bstan-'dzin-rgya-mtsho

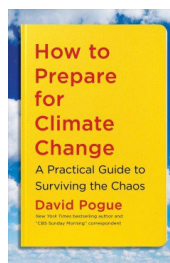

An appeal for environmental action urges decision-makers to fight climate change ignorance while encouraging younger readers to assert their right to a climate-friendly future.

## How Can I Stop Climate Change: What Is It and How to Help

by Friends of the Earth

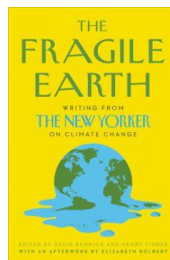

What is happening and why? What are our options? What can you do?

## How to prepare for climate change: a practical guide to surviving the chaos

by David Pogue

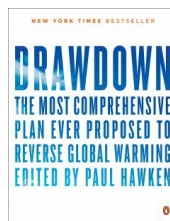

A practical and comprehensive guide to surviving the greatest disaster of our time.

## The fragile earth: writing from the New Yorker on climate change

by David Remnick

A wide-ranging anthology of The New Yorker's groundbreaking reporting on the front lines of climate change.

## Drawdown: the most comprehensive plan ever proposed to reverse global warming

by Paul Hawken

Provides 100 solutions to remedy the climate change crisis, ranging from well-known to obscure, including wind energy, electric vehicles, and microbial farming.

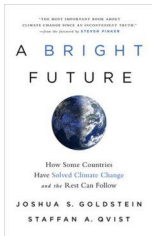

## The new climate war : the fight to take back the planet

by Michael E. Mann

Misleading environmental campaigns by major consumers of fossil fuels have primarily served to redirect responsibility to individuals. Recommendations for compelling governments and businesses to take action on a global level.

# Climate Change

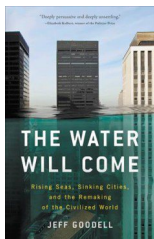

## A bright future: how some countries have solved climate change and the rest can follow

by Joshua S. Goldstein

How cleaner energy sources have quickly and inexpensively replaced fossil fuels in Sweden, France, South Korea and

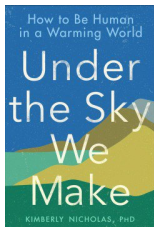

Ontario.

## The water will come: rising seas, sinking cities, and the remaking of the civilized world

by Jeff Goodell

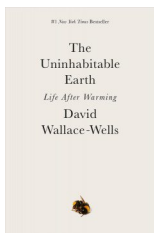

Fact, science and on-the-ground reporting provide an account of the coming new age of great flooding due to rapidly rising sea levels.

## Under the Sky We Make: How to Be Human in a Warming World

by Kimberly Nicholas

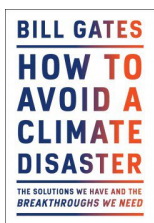

A hopeful, clear-eyed, and somehow also hilarious guide to effecting real change, starting in our own lives.

## The uninhabitable earth: life after warming

by David Wallace-Wells

The profound ways global warming will affect the Earth's ability to sustain human life and civilization, from food shortages to millions of environmental refugees.

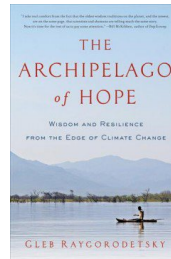

## How to avoid a climate disaster: the solutions we have and the breakthroughs we need

by Bill Gates

An accessible, concrete plan to reduce greenhouse gas emissions and avoid

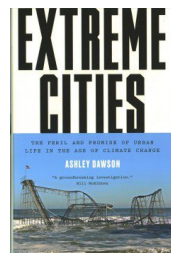

certain environmental disaster.

## The archipelago of hope: wisdom and resilience from the edge of climate change

by Gleb Raïgorodetskiï

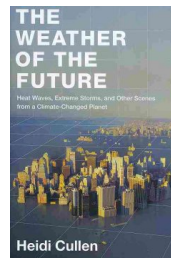

The inextricable links between indigenous cultures and their lands shows the biological and cultural diversity that underlie climate change resilience.

## Extreme cities: the peril and promise of urban life in the age of climate change

by Ashley Dawson

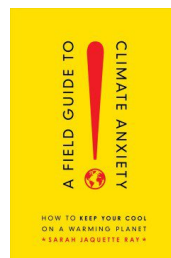

How climate change threatens most of the world's major cities, what they are doing about it.

## The weather of the future: heat waves, extreme storms, and other scenes from a climate-changed planet

by Heidi Cullen

A frightening look at what the planet could look like in 2050 if carbon emissions are not reduced.

## A field guide to climate anxiety: how to keep your cool on a warming planet

by Sarah Jaquette Ray

Why and how we need to let go of eco-guilt, resist burnout, and cultivate resilience while advocating for climate justice.

## American exodus: climate change and the coming flight for survival

by Giles Slade

Argues that in the coming decades, as climate changes and sea levels rise, Americans will need to migrate out of the hot, overcrowded cities and head north as the southern latitudes

become less hospitable.
